

POWER SEEDING

What is Power Seeding?

Power Seeding is an exclusive service of Lawn Doctor. Power Seeding is one of the best things you can do for your lawn. Our patented “**Turf Tamer Power Seeder**” prepares the soil and plants the right amount of seed just beneath the surface of the soil. It will inject seed into the soil without damaging the existing, healthy turf. Scan the QR code to watch a video.

When is the best time to seed my lawn?

We will start Power Seeding in August, weather permitting and will continue to seed through the end of Fall.

What kind of seed do we use?

Lawn Doctor’s exclusive **New England Blend** is the perfect mix of seed for lawns in our region. It is a blend of Perennial Ryegrasses and Kentucky Blue-grass varieties that thrive under different sun, shade and soil conditions. This blend is designed to complement your existing turf for a seamless appearance.

Fertilization & Weed Control

Our Lawn Care fertilizer program will continue on schedule to make sure the nutrients are available for the newly planted grass to flourish. We cannot apply any weed control to newly seeded areas until the grass is mature enough that it has been mowed 2 times.

Warranty

We guarantee that all work will be done by professionals and that all materials used will be of the highest quality. We guarantee Power Seeding results for **6 months as long as you remain on our Annual Lawn Care Program**. If any bare areas persist after the first attempt, we will re-do the service during the next appropriate season.

Your lawn care technician will note your account if he thinks your would benefit from a fall **Power Seeding**. Call our office to speak with one of our Lawn Care Specialists at **781-829-9515** to get more information on this valuable service.
